

Junior Software Developer

Python | Agile Trained | Detail-Oriented

- Student of **Software Engineering Technology - Artificial Intelligence** with foundational understanding of software development, requirements engineering, and object-oriented design
- Knowledgeable of Agile practices, user-centered design principles, and software testing/QA concepts
- Detail-oriented approach to writing clear documentation and debugging code across multiple languages
- Developing competency in Artificial Intelligence, including automation, machine learning, and AI ethics
- Skilled with: Python, Java, C#, JavaScript, SQL, HTML/CSS, Node.js and MongoDB
- Tools: Git/GitHub, IntelliJ, JetBrains Rider, Visual Studio Code, Oracle SQL Developer, and Eclipse

Technical Skills

|                   |                                        |                               |
|-------------------|----------------------------------------|-------------------------------|
| Python            | Object-Oriented Programming (Java, C#) | Database Design & SQL         |
| Web Development   | AI & Machine Learning Foundations      | Technical Documentation (SRS) |
| Agile Methodology | Unix/Linux Fundamentals                | Version Control (Git/GitHub)  |

Education

Software Engineering Technology - Artificial Intelligence (Co-op) Advanced Diploma

Sept. 2025 - Present

Centennial College, Toronto, ON

GPA: 4.0/4.5 (A)

Courses: Web Interface Design | C# Programming | Linux/Unix | Python Programming | Java Programming | Web Application Development | AI Systems Design | Requirements Engineering | Client-Side Development

Academic Projects

- Software Requirements Specification Document - GradeBoost AI
- Created a Software Requirements Specification (SRS) for an AI-driven grade-tracking application
  - Defined project scope, stakeholders, features, and functional/non-functional requirements
  - Demonstrated system behaviour through UML, use case scenarios, class diagrams, CRC cards, sequence diagrams, state diagrams, and a swim lane diagram
- Web Design - Real Estate Listings Website
- Designed a multi-page real estate website showcasing different property listings along with an interactive site map using HTML and CSS
  - Organized and structured page layout to help users browse listings and obtain information efficiently
- Python Programming - Grade Calculator
- Programmed a Python-based grade calculator which converts a numerical grade value into the corresponding letter grade
  - Applied input validation to handle any range of grade entries to ensure accurate output

Professional Development

Data and Programming Foundations for AI | Codecademy (Remote)

In Progress

Python for Programmers | Codecademy (Remote)

February 2026

Work Experience

- Crew Member | McDonald's, Toronto, ON
- Sept. 2022 - July 2024
- Provided quality customer service in a fast-paced and high-volume environment
  - Prepared orders with accuracy and efficiency while working collaboratively with team members

**Event Coordinator Crew Member** | PrettyFlyEvent Creations, Toronto, ON Sept. 2022 - Present

- Collaborated with team members to ensure setup for events was completed with accuracy and on schedule
- Communicated with clients on-site to confirm any specific setup details and expectations were matched within the project scope of the event
- Adapted quickly to make any changes in event layout or timing under a scheduled time
- Maintained attention to detail and presentation while managing setup and takedown tasks

---

## Interests

### Video Editing & Cinematography

- Self-taught on platforms for editing videos, providing videos to various organizations, businesses and community members
- Create videos and content for special events, businesses, and personal social media

### AI & Business Optimization

- Self-taught in AI workflow automations; built an email management and invoice follow-up system for an event coordinating business and trained them to use AI tools
- Exploring how to connect multiple platforms to build automated systems
- Interest in how AI can be used to scale and automate business tasks
